Blogs: https://medium.com/@kr-vikash3491 , http://advancecomputing.co.in/
Date of Birth: 03-Apr-1991| **Nationality**: Indian |

PROFESSIONAL SUMMARY

Java Developer with 8+ years of experience delivering enterprise applications across banking, finance, automotive, e-commerce, and media sectors. Proficient in Java 17, Spring Boot, microservices architecture, and cloud platforms (AWS, GCP). Demonstrated track record of implementing secure financial applications, maintaining 99.7%+ SLO availability, and establishing CI/CD infrastructure with Terraform and Kubernetes.

EDUCATION

MSC in Computer Science | Pondicherry University, Puducherry | 2012 – 2014 |
BCA in Computer Application | Patna Science College, Patna | 2009 – 2012

PROFESSIONAL EXPERIENCE

Baxter Planning, Remote, India | **Software Engineer II** | Sept 2024 – Present
***Project**: Prophet – ALM (Asset Lifecycle Management)*

- Architected and developed graphql APIs and backend logic for the ALM module using Java 21, Spring Boot, Angular and AWS cloud
- Implemented logic for the LTB (Last Time Buy) module to calculate optimal purchase quantities by integrating variables such as return rates
- Collaborated on integrating ML-based forecasting models into the planning workflow to generate accurate projections for NPI
- Developed monitoring and alerting features for the EOL (End of Life) module to track inventory health post-LTB and provide early intervention alerts for supply-chain planners
- Followed TDD approach for validating the business scenarios and Standardized the code quality and coverage using sonar and unit & integration testing

Ford Motors, Remote, India | **Tech Lead** | March 2023 – Sept-2024
***Project**: FordLiive Powerwall*

- Designed and developed REST APIs using Spring Boot and Java 17 for an automotive telematics platform
- Gathered requirements and translated automobile domain specifications into technical solutions
- Implemented cloud infrastructure on GCP with 99.7%+ SLO availability and high throughput capabilities
- Provisioned infrastructure using Terraform modules with Tekton CI/CD pipelines, achieving 90%+ deployment accuracy
- Applied Test-Driven Development methodology to validate business logic and standardized code quality and coverage using SonarQube and unit testing

EPAM Systems, Pune, India | **Senior Software Developer** | December 2020 – March 2023
***Project**: BRD-GLOS*

- Developed RESTful services using Java 11 and Spring Boot within a microservices architecture for banking applications
- Contributed to technical design documentation, including High-Level Design (HLD) and Low-Level Design (LLD), with 99.8% SLO
- Built secure banking and finance applications implementing Spring Security and industry-standard security protocols
- Integrated backend services with frontend teams and coordinated deployment activities with DevOps
- Implemented NoSQL database solutions using MongoDB and DynamoDB for scalable data persistence
- Applied SOLID principles and clean code design patterns to standardize the software development process

CYBAGE Software Pvt. Ltd, Pune, India | Senior **Software Developer** | January 2018 – November 2020
***Project**: Decisionmines*

- Architected REST APIs using microservices architecture for a cloud-native decision analytics platform
- Prepared technical design documents (HLD/LLD) for cloud-native application components

- Maintained 99.99% monthly uptime for EC2 instances deployed across multiple AWS Availability Zones
- Synchronized with frontend and machine learning teams to deliver feature requests
- Implemented caching and asynchronous features, improving application performance by 80%+

BLAZECLAN Technologies Pvt. Ltd, Pune, India | **Cloud Engineer** | May 2017 – January 2018
***Project**: AMS, Astro*

- Designed and developed cloud-native applications on AWS infrastructure with 99.5% monthly EC2 uptime
- Translated media domain requirements into technical specifications for microservices-based solutions
- Executed deployment pipelines using Jenkins on AWS environments
- Configured and managed AWS services including EC2, S3, RDS, Elasticsearch, and Lambda functions
- Technologies: Java 8, Spring, Hibernate, Spring Boot, AWS, Git, Jenkins, Mockito

NOTEWORTHY ACHIEVEMENTS

- Employee of the Year
- Pat-on-Back Award

TECHNICAL SKILLS

- **Programming & Frameworks:** Java 8/11/17, Spring, Spring Boot, Spring Security, Hibernate, Spring Batch, ORM Framework
- **Microservices & Messaging:** REST API, Graphql, IBM MQ, Rabbit MQ, Kafka and Microservices Architecture
- **Cloud Platforms:** AWS, GCP
- **Databases:** MongoDB, Oracle, MySQL, MariaDB, Postgresql, MsSql
- **DevOps & CI/CD:** Jenkins, Terraform, Tekton, Docker, Kubernetes, Liquibase, Flyway
- **Build Tools:** Maven, Gradle
- **Testing:** Mockito, SonarQube
- **Frontend:** HTML/CSS, Angular
- **Monitoring & Logging:** Splunk, Kibana, Graphana, Datadog
- **Storage & Caching:** Redis Cache, Hazelcast, Apache Parquet
